

Bob Smith Machine Learning Engineer Austin, TX bob.smith@email.com | linkedin.com/in/bobsmith-ai | github.com/bob-ai-labs

Summary

Innovative AI Developer and Machine Learning Engineer specializing in neural network architecture and data analysis. Passionate about exploring edge-case model behaviors, red-teaming AI systems, and building robust backend infrastructure for generative AI applications.

Technical Skills

- **Languages:** Python, JavaScript, SQL, Rust
- **Frameworks:** TensorFlow, Keras, Pandas, FastAPI, React
- **Infrastructure:** Azure ML, Docker, Git, PostgreSQL

Professional Experience

InnovaCore AI | Austin, TX *Junior ML Engineer* | 2023 – Present

- Collaborated on the development of computer vision models for defect detection in manufacturing, achieving 94% accuracy on the test set.
- Managed data preprocessing pipelines, cleaning and labeling over 100,000 images using custom Python scripts.
- Integrated machine learning APIs into the primary company dashboard using FastAPI and React.

Education B.S. in Software Engineering University of Texas at Austin | 2019 – 2023
